All Workers Welcome!

We are a group of manufacturing workers, trades workers, and rank-and-file UAW members from across the Midwest and South working for a Free Palestine. Join us and learn how a united rank-and-file can fight to stop genocide.

We're organizing a virtual call with other workers in our sectors to discuss the growing antiwar movement that the UAW joined early on and what it means for us.

The fact is, most companies - including within the UAW - are connected to the war in some way - manufacturing weapons or selling products to defense contractors.

We know our union has a position, but what are these companies actually doing to contribute to Israel's war effort? How does the antiwar movement impact us, and what do we want from our workplaces?

Come join us.
We want to hear from you!
